

CSU: Keep the Promise

California State University's largest workforce is made up of staff and student assistants who support the system's 23 campuses. From processing admissions to cleaning dorms to maintaining IT servers, CSU Employees Union's 30,000 represented workers are there to ensure every student is supported on their academic journey.

We successfully advocated this spring for full funding for Cal State because we believe in the University mission - and we believe a CSU degree can be life-changing.

We ask for your support as we demand that CSU leadership keep their promise of negotiated raises with workers. Tell Management to honor their contract with frontline staff who support student success.
